Geographic Service Area	State-Wide
System for Prioritizing Assistance Narrative	<p>The State in its Applicant Management System (AMS) prioritizes applicant applications by tiers. Tier 1 is made up of those below 50% AMI and those who have experienced unemployment for more than 90 days are given first priority for processing. The State serves households up to 80% AMI and will continue to pay applicants who have forward-only rents based on funding availability. The State’s Program Guide as posted on the website <a href="http://www.LAStateRent.com">www.LAStateRent.com</a> provides details of prioritization (page 9).</p> <p>In Q1 2022, the program continues to prioritize and expedite renters who have an eviction notice and in risk of imminent eviction. The State closely tracks all files with an eviction notice. Through the end of March 2022, there are 7,011 applicants reporting having received eviction notices. Of these, 6,071 have been approved for payment, and 898 are being prioritized in case management or QC review.</p> <p>Further, the State continues communication and outreach to inform local Justices of the Peace and court systems of the ERA Program and continues to respond to the established “hotline” for communication where the courts can call directly to confirm a tenant’s standing in the program and potentially seek a delay in the eviction going forward if approved for funding. Over the Q1 2022, seven direct phone inquiries were received by the “hotline.”</p>
	<p>The main objectives of the program are as follows:</p> <ul style="list-style-type: none"> <li>• Keep people housed during the pandemic by preventing evictions for failure to pay rent.</li> <li>• Serve the maximum number of households as quickly as possible while prioritizing those in greatest need.</li> <li>• Ensure equitable geographic, race, ethnicity, and gender distribution of assistance.</li> <li>• Compensate landlords for unpaid rent during eviction moratoria.</li> <li>• Pay overdue utilities to promote housing stability for vulnerable households.</li> </ul> <p>The Program provides statewide emergency rental and utility assistance to individuals and households who are at risk of experiencing homelessness or housing instability due to the COVID-19 pandemic. Eligible applicants may receive assistance for rental and utility arrears (back to April 2020)</p>

## Project Description

or forward rent payments (maximum of 3 months), not to exceed a total of 15 months. Payments under the program are primarily made to landlords, property owners or management companies (hereinafter referred to as “landlord”) and utility providers but, in certain circumstances, may be made directly to the tenant, consistent with federal guidance when landlords or unresponsive or uncooperative. Direct payments to tenants are limited to a maximum of 6 months.

The LA ERA Program launched utilizing ERA 1 funds on March 5, 2021, prioritizing applications and issuing award payments for rental assistance. By the end of the March (less than one month) the program had over 9,000 applications started and over 2,400 applications submitted. The State anticipates receiving an estimated 30,000-40,000 applications and assisting all eligible households that complete the application process. ERA 1 projection is to fund 16,000 applicants at an estimated \$79 million, which appears to be on target. With the inclusion of ERA 2 funds, the Program anticipates funding an additional 9,000 applicants over the next 6-8 months. The Program has determined to pay supported monthly rents up to and not to exceed 120% of Fair Market Rents (FMR). Based on the availability of funds, the State may consider recertification (additional 3 months payment) as well as the expansion to housing stability services.

The Program continues to meet expectations on the number of new applications started per week and the number of applications that get 100% submitted per week. The trend over Q1 2022 remained constant, with a slight decline from January to March, but still receiving an average of over 500 new applications started per week and an average of 300 applications fully submitted per week over the Quarter. Effective and targeted outreach and engagement efforts, above and beyond program-wide communications efforts, were instituted, heavily for the first 4 months to ensure that those most in need of this assistance can navigate the application process and receive the assistance. The following represent public messaging and communication about the Program application, policies and status updates to keep the public and applicant informed.

- The program’s website [www.lastaterent.com](http://www.lastaterent.com) was established on March 5th for program information, tutorials on the application process and link to submit applications, as well as program policies. During Q1 2022, the website was enhanced to streamline program information and increase visibility of reporting suspected incidences of fraud, waste or abuse.
- The program operates a Contact Center staffed by Intake Specialists. The Contact Center receives inbound calls (877-459-6555) from 8:00am – 5:00pm, Monday-Friday. In the early part of Q1 2022, the Inbound Calls exceeded 5000/week, but reduced in February to 3500/week and in March to an average of 2800/week. In previous quarter, the Contact Center launched a “Status Text” protocol which allows applicants to send and receive a text message with the latest status of their application. In January, the Contact Center was sending out over 700 text messages/week. By March, there was a slight decrease, but still averaging nearly 400 text message status updates per week.
- Further, under the Outreach and Engagement Strategy the

	<p>program initiated direct ERA program awareness efforts in communities of greatest need and to provide or facilitate the provision of the support needed for Renters and Landlords to participate in the program – ensuring high and equitable application rates and more successful application processing, while reducing the possibility for widespread evictions once moratoria expire. The program also launched coordination with LA Realtors Association and Apartment Association. The program continued through Q1 2022 to update FAQs and monitor traffic to its website to determine areas of highest interest.</p> <ul style="list-style-type: none"> <li>• The Contact Center/Program Management Office (PMO) monitors the <a href="mailto:info@lastaterent.com">info@lastaterent.com</a> inbox to respond quickly to incoming inquiries. The program also established a judicial ‘hotline’ for communication where the courts can call directly to confirm a tenant’s standing in the program and potentially seek a delay in the eviction going forward if approved for funding. Over the Q1 2022, seven direct phone inquiries were received by the “hotline.”</li> <li>• The Program also continues to support housing stability services through a contractual arrangement with the Southern University Law Center who assists applicants and landlords in avoiding evictions. The Program provides flyers and outreach literature for distribution in the court system. The Contact Center/PMO also response to Southeast LA Legal Services to assist tenants at risk of eviction through providing details on program eligibility and funding.</li> </ul>

## Performance & Financial Report

<p>Performance Narrative</p>	<p>Quarter 1 2022: January to March 2022 (SAME FOR ERA 1 and ERA 2)</p> <p>By the end of the March 2022 (1 year of operation) the program had nearly 65,000 applications started and over 17,000 renters approved for payment. With the launch of spending ERA 2 funds at the end of Q1 2022, the Program funded nearly 2,000 with ERA 2 funds and over a total of nearly 16,000 with ERA 1 funds. With the inclusion of ERA 2 funds, the Program anticipates funding an additional 9,000 applicants over the next 6-8 months. Program participation continues to be steady with a slight decrease from previous quarter. Applications submitted averaged over 300/week. There were nearly 27,000 tenant applications connected to their landlords in the Applicant Management System (AMS) through the Q1 2022 of the program.</p> <p>The Program focused on improved speed of award determinations and assisting applicants to get over the finish line with their application. As a result, 97% of applications submitted in 2021 reached a final determination in Q1 2022, with 85% of those approved. A notable challenge continues to be confirming the participation of the landlord to receive payment and complete their part of the application. The Program continues to implement its policy of Direct Tenant Payment when a landlord is unresponsive or unwilling to participate. These Direct Tenant Payments are limited to 6 months under the State policy. By the end of Q1 2022, a total of 2,993 tenants have received Direct Tenant Payments totaling \$11.7 million. The Program has also seen a slight decline in the average rent payment per tenant, which in Q1 2022 was \$4,620, whereas previously was \$5,500.</p> <p>The program continues to have a strong record of paying past due utilities to bring renters to current on their utility bills. The direct data sharing agreement with Entergy and Cleco, the State's largest energy providers is a best practice and has successfully facilitated quick and more up-to-date payments. The relationship with the utilities and their understanding of the program due to PMO outreach has also enabled the Program in Q1 2022 to provide "pledges" for payments that have been approved but not yet arrived, in order to avoid any utility disconnects. In total, the Program has approved over 10,000 utility payments, totaling nearly</p>
------------------------------	---

	<p>\$5.1 million through Q1 2022, mainly in ERA 1 but beginning to be covered by ERA 2. The LA Program only pays utilities upon rental payment approval. Effective and targeted communications and updates to the website efforts were undertaken and continued to ensure that those most in need of this assistance are informed of the application processes and the review process, as well as when approval is reached.</p> <ul style="list-style-type: none"> <li>• In Q1 2022, the Program continued with the “QuickSend Text Update” process where applicants can send and receive a text message updating their status of their application in the review and approval process. Over 500 text messages are sent on average each week.</li> </ul> <p>Housing stability services consist of the Program’s intensive effort at the Contact Center and Case Managers. The Contact Center Intake Specialists respond to the needs of applicants in identifying needed resources and completing their application for rent and utility assistance. The Program Contact Center responds to an average of 3,000 incoming inquiries a week through phone, text and email. Many applicant cases are elevated to more intense assistance via a Case Manager, who can move them forward with their application or refer to other resources as needed in an effort to maintain housing stability. The program works on an ongoing basis with housing advocacy groups to refer applicants and to increase the effectiveness of the engagement efforts.</p> <p>The State and Program have prioritized Anti-Fraud, Waste and Abuse efforts to ensure validity of applications and full compliance to commitments by landlords and tenants. The State has also reviewed expired payments or those not cleared and returned those funds to the Program.</p>
<p>Narrative on Effective Practices</p>	<p>Quarter 1 2022: January – March 2022</p> <p>The program continues to implement revisions to the use of attestations and third party data to reduce the documentation requirements for full application submittal. This has resulted in an expedited review of files by Case Managers and increase in funding approvals. The State increased use of direct tenant pay for unresponsive or uncooperative landlords which allowed for an over doubling of files to move forward previously waiting on landlords. To ensure compliance and reduce fraud potential, the State limited direct tenant pay to 6 months total and implemented a policy of checking third party assessor record and other sources to confirm the property ownership and residency.</p> <ul style="list-style-type: none"> <li>• In Q1 2022, the Program continued with the “QuickSend Text Update” process where applicants can send and receive a text message updating their status of their application in the review and approval process. Over 500 text messages are sent on average each week.</li> </ul> <p>The program continues to use 3rd party data on income from SNAP and the Louisiana Workforce Commission to confirm unemployment benefits and income. Receiving updated quarterly data allows direct confirmation of income changes over time.</p> <p>The close relationship with the utilities and their understanding of the Program due to PMO outreach has also enabled the Program in Q1 2022 to provide “pledges” for payments that have been approved but not yet arrived, in</p>

order to avoid utility disconnects. In total, the Program has approved over 10,000 utility payments, totaling nearly \$5.1 million through Q1 2022, mainly in ERA 1 but beginning to be covered by ERA 2. The LA Program only pays utilities upon rental payment approval.
