

WHY

Our mission is to enable large-scale sustainable in fashion through business and value inspiration

- We aim to lead the global transition to circular fashion while driving sustainable business growth. Our purpose is to empower customers to join the circular transformation through high-quality, sustainable products and services that support our strategic goals.
- We also ensure trust and integrity in our products through governance, including transparent chain-of-custody models and end-to-end traceability, so that sustainable change happens with full accountability.

HOW

Our international team strives on constant learning, innovation, and operational excellence

To achieve leadership in our sector and deliver on our strategic priorities, we commit to:

- Continue pioneering sustainable materials, as we have done since 1947.
- Supporting and embracing technological innovation in processes and products.
- Building efficient and scalable systems to optimize resources and enable autonomous operations.
- Maintaining high standards of quality and sustainability across all products, processes and facilities.
- Applying strong governance with an identity-preserved chain of custody, material identification, and end-to-end (physical & digital) traceability from site to labeling.
- Ensuring compliance with all applicable requirements and fostering a culture of continuous improvement.

WHAT

We transform textile waste into sustainable recycled fibers and products, closing the loop in fashion

We guarantee reliable, high-consistent-quality products though systematic quality control and improvement. Our products are:

- Cost-competitive and scalable, supporting growth and resource optimization.
- High-consistent-quality and best-in-class, combining decades of expertise with innovation.
- Safe and fit for circular systems, meeting product certifications and design-for-recyclability standards
- Fully traceable and responsibly managed, backed by a transparent, identity-preserved chain of custody and rigorous physical and digital traceability that verify material origin, monitor transformation steps, and ensure claim accuracy from production to labeling.

Madrid, January 15th, 2026. This policy will be renewed on an annual basis.
