

**CIRCULAR
FASHION
FOR ALL**

Recover™ is a leading materials science company and global producer of low-impact, high-quality recycled cotton fiber and cotton fiber blends.

OUR RECYCLING PROCESS

1. Textile waste from Retailer/Brand

Textile waste is submitted for recycling. Recover™ also offers closed-loop and mass balance models.

2. Recover™ process

The Recover™ hub uses its innovative technology to process textile waste clips.

3. Recover™ fiber

Low-impact, high-quality Recover™ fiber is produced, ready to integrate into the supply chain.

4. Recycled yarns

Local spinning partners create new yarns from Recover™ recycled cotton fibers.

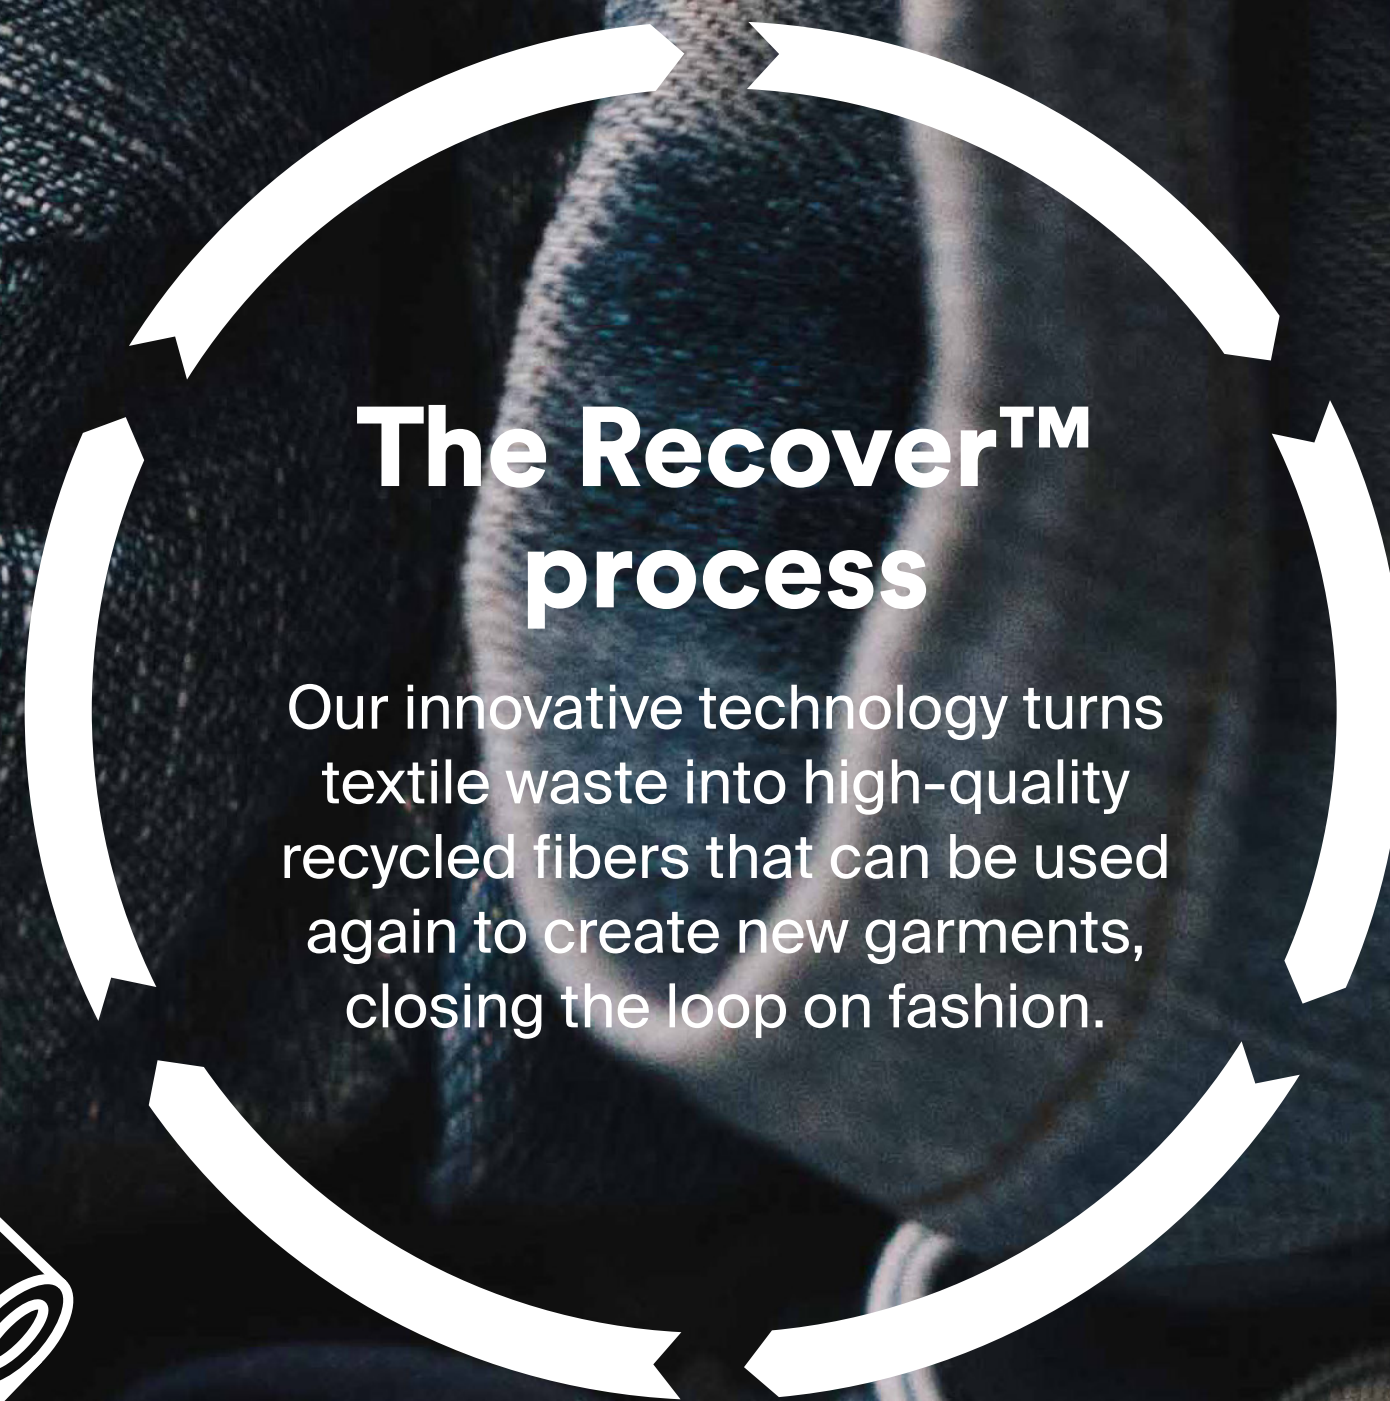

5. Recycled fabrics

Local weavers develop custom fabrics, ready to be used for garment production.

6. Recycled low-impact product

Local garment manufacturers produce finished goods from the waste.

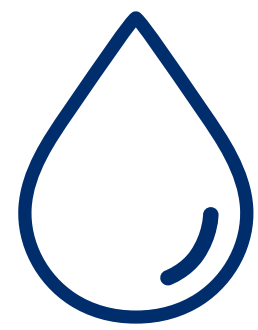

Learn more about the Recover™ process.

OUR COMMITMENT

Environmental impact

Recover™ recycled cotton fiber saves up to*:

99,9%
Water

99,9%
Eutrophication
(PO3-eq)

93%
Global Warming
Potential (CO2 eq)

96%
Energy

100%
Land use

Third party certifications & associations

As a leader in sustainability, Recover™ remains committed to enhancing the environmental performance and social responsibility of its products and solutions through active collaboration with industry certification bodies and associations.

OUR SOLUTIONS

Plug-and-play integration of recycled cotton fiber.

FIBER

Seamless integration of low-impact, quality-consistent Recover™ recycled natural fiber at scale into your current offering:

- _ Existing core products
- _ Fabrics in your existing supply chain

YARN

Ready to deliver, high-quality yarns made with certified Recover™ recycled cotton fiber, through our network of 140+ global spinning partners.

FABRICS

Recover™ fabrics, ready for quick collections.

From value to premium options, all with certified Recover™ recycled content, developed in collaboration with our partner network.

GARMENTS

Ready-to-sell garments for white label offerings or capsule collection.

- _ Blanks
- _ Recover™ One (100% recycled)

75+ YEARS OF RECYCLING INNOVATION

Recover™ continually invests in scaling and expanding its global recycling capacity. The company's headquarters and innovation center are located in Spain, while its production facilities are strategically positioned in key regional textile hubs.

The image shows three fabric swatches arranged diagonally from the top right to the bottom left. The top swatch is dark blue, the middle is white, and the bottom is black. Each swatch has a small, light-colored tag with the word 'recover' and a small logo printed on it. The background is a solid, textured blue fabric.

OUR IMPACTS

Recover™ recycled cotton fiber impacts according to Higg MSI Methodology and Data Version 3.10.0 - April 2025

According to the Higg MSI (Higg.org) 3.11.0 - November 2025, Recover™ recycled cotton fiber consistently shows lower environmental impact compared to conventional cotton, organic cotton and BCI cotton (India) across five categories: Global warming potential, Eutrophication, Water scarcity, Fossil fuel depletion and Chemistry. It outperforms generic recycled cotton in four out of five categories.
