Feature Details

Chevron Technology

Our chevron technology uses smart diagonal reflective tape to wrap around the body and arms to provide a higher level of style and safety for the wearer.

Double Breast Pockets & PAM Loops

The double breast pocket ensures there is always room for your work items to be stored and accessed, and the PAM radio loop provides a handy way to hang your radio or gas detectors.

Multi Pocket

Pockets are a vital feature on the outer layers of FR & Arc flash workwear and PPE, and our coveralls and boiler suits provide multiple pockets that are easy to find, access, and close.

Popper Cuff Secure

We have provided popper cuffs on our garments to provide maximum levels of adjustability for added safety, and additional access to watches and other wearable technology.

Full-Gusset Ankle Cuffs

Our flexi-gusset ankle cuffs are designed to maximise mobility and consistently increase the range of leg motion available to the wearer whilst working.
