Product Features

Velcro storm flap

Scooped back

Flexi-gusset technology

Roll-up hood

Chevron design

SKU: C21.FB4222

Feature Details

Roll up hood

A roll up hood is an essential safety feature for working in extreme conditions at height, as it prevents the hood getting caught in the wind and pulling at the jacket around the neck.

Velcro storm flap

A vital feature that provides an additional layer of protection against harsh weather conditions, such as wind and rain, by preventing moisture from penetrating and providing insulation against the cold.

Flex-gusset technology

Our flex-gusset technology is a valuable workwear feature designed to maximise mobility and increase the range of leg, arm, and body motion available to the wearer.

Scoop back

The scooped back design of our tops prevents the garment from becoming untucked or riding up and letting cold air in when bending over.

Chevron technology

Our chevron technology uses smart diagonal reflective tape to wrap around the body and arms to provide a higher level of style and safety for the wearer.

Fabric Specifications & Standards

Fabric: Lenzing FR viscose provide smoothness and comfort, Protal Modacryl provide security with an inherent and permanent flame resistance fabric. Antistatic to protect from electrostatic discharge hazards.

IEC 61482
Electric Arc

EN 1149
