

# Innovative solutions - CtrlFlow

CtrlFlow can completely change the cleaning and disinfecting process in your work environment. CtrlFlow reduces plastics, costs, logistics and transport by replacing up to 90% of your regular cleaning and disinfectant products.

CtrlFlow uses innovative technology to create a fully sustainable supply of cleaning and disinfectant liquid solution from water and salt that is completely hypoallergenic and up to 100 times more effective than bleach.

The CtrlFlow system eliminates the need for the procurement, delivery and cost of synthetic chemicals used in many marine environments. CtrlFlow is a game-changing solution that's easy to adopt and can be made whenever it is needed.

1

Replace up to 90% of synthetic chemicals

2

Remove SUP & enhance sustainability

3

Reduce costs & storage space
