

Hit Targets while Managing Uncertainty and Risks

This workshop introduces the strategies required for asset reliability initiatives and provides insight into where your company can best benefit from focus and improvement.

The workshop is facilitated by Michael (Mike) Aroney, In his current role with Allied Reliability, Mike provides essential support to customers as they progress on their reliability journey, with a focus on leadership, governance, and change management. He specializes in execution and rapid achievement of performance objectives.

Combined with his advanced degrees in organizational psychology, adult learning, and business management, he possesses a wealth of knowledge that he applies to improve workplace learning.

Mike has experience in various industries. He has published numerous articles on leadership and change management in various trade journals and provides keynote speeches and presentations on change management and leadership for maintenance and reliability professional organizations.
