3-DAY COURSES (2.4 CEUs) | Virtual Delivery Options

COURSE	TARGET SKILLS	TARGET AUDIENCE	DATES
Leading Reliability Improvement	Learn strategies required for leading asset reliability improvement initiatives to attain a higher likelihood of success, from assessing current state to designing organizational structures and strategies.	Managers, Directors, Vice Presidents, and anyone whose role has the ability to influence and control the learning items	March 14-16 (SC) June 20-22 (SC)
Reliability Fundamentals	Learn the principles of improving asset management and maintenance decision making using proven reliability principles.	Maintenance Managers, Reliability and Maintenance Engineers, Top Level Maintenance Technicians, Production Managers, Plant Engineers, and anyone involved in Reliability strategies	Jan 31 - Feb 2 (SC) July 11-13 (SC)
Condition Monitoring Fundamentals	Learn the fundamental principles behind the 5 predictive technologies most prevalent in industry today.	Managers, Engineers, Planners and Supervisors who are responsible for metrics, tracking and use of information generated by CM programs	April 11-13 (SC) August 29-31 (SC)
Planning & Scheduling Fundamentals	Use the most effective maintenance planning and scheduling practices to manage and prioritize backlog and efficiently use labor and resources.	Maintenance Planners and Backups, Coordinators, and Supervisors or Managers, Operations or Production Coordinators, and Outage Managers	January 17-19 (SC) June 13-15 (SC)
Intermediate Planning & Scheduling	Manage the life cycle of work from work identification to work order closing.	Maintenance Planners, Operations or Production Coordinators, Reliability Engineers, and Maintenance Managers	May 2-4 (SC) October 3-5 (SC)
Shutdown, Turnaround, Outage (STO)	Gain practical and immediately transferrable knowledge on the preparation and management of industrial STO events.	Maintenance or Operations Superintendents, Maintenance Managers, Shutdown Managers, Maintenance Planners, Reliability Engineers, and anyone involved in STO events	March 28-30 (SC) August 22-24 (SC)
Root Cause Analysis (RCA)	Solve plant equipment problems as you learn facilitation skills for an effective RCA. Develop, select, and implement effective corrective actions.	Managers, Supervisors, Engineers, Reliability Engineers, Craftspeople	May 9-11 (SC) October 17-19 (SC)
Basic Reciprocating Compressor Analysis	Learn the basic applications of reciprocating compressor analysis data, how the data is generated, what it means, and how it relates to machinery health and safety.	Engineers and Process and Maintenance personnel	Feb 28 - Mar 2 (TX) July 25-27 (TX)
Advanced Reciprocating Compressor Analysis	Learn advanced applications of reciprocating compressor analysis data and how to apply the results to everyday compressor operation.	Engineers, In-house Analysts, and Process and Maintenance personnel	April 11-13 (TX) September 12-14 (TX)
Developing Effective Work Procedures	Design, develop, and construct effective work procedures, including Job Plans.	Planners, Maintenance Engineers, and Reliability Engineers	August 15-17 (SC)

PRIVATE TRAINING

Our instructors can travel to your site and train your team in their own environment or you can send your team to train off-site at one of our regional locations. We can also deliver some training content virtually. Select the topics and approach that work best for you:

- o **Off-the-Shelf:** our cost-effective, ready-developed standard course offerings
- o **Customized:** from minor modifications of existing courses all the way to a curriculum designed from the ground up to fit your terminology and culture

Contact us today to get the training for your team to succeed.
